*) <i>Strikethrough the unnecessary items</i>			
<i>The penalty for CHEATING is DROP OUT!!!</i>			

Case (100%)

In this final exam project you are required to create a web-based application using Laravel 7 framework. The theme of the application is Blog Tourism of Indonesia. Users are allowed to write their travelling experience when enjoying Indonesia tourism. User blogs are grouped in few **categorizes** such as **Beach, Mountain**, etc. Here is the example picture :

Database structure :

Work guidelines:

- Use **only** Laravel 7 framework and MySQL database.
- Do **not** change database structure. Use same table names as example above.
- Use Laravel feature (**Eloquent/Model, Controller, Migration, Seeder, Blade/Layout**, etc).
- Be creative, as long as it is still align with feature description above.
- **Your application must work properly. Do not send project file directly to Binusmaya. Submit it to online storage/cloud and attach your project link into your answer-sheet.** You can add screen capture of your code and web pages to support your project.
- Please add your contact into your answer-sheet for fast follow up if any problem occur with your project link.

-- Good Luck --
